SUMMARY

Global professional with a solid career in project leadership, operations, strategy, and digital transformation across large enterprises in Latin America, the United States, Europe, and Asia — including ArcelorMittal, Apple, Petrobras, and Yara. Strong expertise in financial management (P&L), corporate governance, strategic contract management, and leading high-impact negotiations. Specialist in structuring efficient operations, managing complex portfolios, and leading high-performance teams, ensuring operational rigor, risk mitigation, and sustainable delivery of results. Recognized for the ability to connect strategic vision, disciplined execution, and a continuous focus on value creation for the business.

My Portfolio: <https://lmramiresconsultoria.com/>

KEY ACHIEVEMENTS

1. Led a global transformation case generating savings of over USD 1.16 billion for a major oil & gas client, including USD 24 million saved within just three weeks.
2. Executed e-commerce implementations generating more than USD 480 thousand annually in revenue.
3. Achieved financial margin improvements of +400% in critical projects, directly impacting overall corporate profitability by +10%.
4. Negotiated and closed over 12 high-value contracts, establishing strategic partnerships with global vendors.
5. Successfully managed 300+ professionals across projects, operations, and multidisciplinary teams.

PROFESSIONAL EXPERIENCE

Specialist Project Manager

GRUPO LPJ 

jun/2025 - Present.

I lead national and international projects in the industrial sector, driving strategic initiatives focused on strengthening customer relationships and generating business value. I manage projects involving Power BI, Artificial Intelligence, RPA, UX, Infrastructure, Full Stack development, and Data Engineering, promoting innovation and operational efficiency. I am responsible for managing technical resources, overseeing delivery governance, and using the Azure platform for demand control, ensuring organization, predictability, and productivity. I prepare executive reports for senior leadership and stakeholders, ensuring alignment on expectations, risks, and project progress. I contribute to the development of multidisciplinary teams, support tactical and strategic planning, and deliver corporate presentations aimed at leadership development and reinforcing a high-performance culture.

Key Skills: AI, BI, Business, Data, Digital Transformation, Infrastructure, KPIs, Operations & Project Management, Power Apps, Relationship Management, Strategy, Technology, UX.

Operations and Project Manager

TATA CONSULTANCY SERVICES 

jan/2023 - jun/2025.

Management of 13 accounts across Latin America and the United States, leading a portfolio of 150+ professionals. I conducted training sessions and mentorship programs for managers, pre-sales meetings, executive presentations, and participated in the preparation of RFPs and the identification of new business opportunities. I worked on the implementation and management of IT operations, definition of KPIs and project targets. I was responsible for the portfolio's P&L, applying MIP strategies, developing financial plans, and leading risk management activities. I managed the commercial pipeline, contractual renegotiations, claims preparation, and internal audits. I prepared executive reports, ensured contractual compliance, and led technological initiatives. I implemented performance improvement plans, structured internal processes, distributed activities, conducted feedback sessions, and led SCRUM ceremonies, strengthening governance and operational efficiency.

Key Skills: Contracts, Finance, KPIs, Business, Operations Management, Partnerships, P&L, Processes, Project Management, Relationship, RFPs, Sales, Strategy, Technology.

Technology Consultant

PRIME IT 

feb/2022 - jan/2023.

I led the structuring of delivery workflows and the definition of documentation standards in RPA, ensuring organization, quality, and scalability. I conducted analyses comparing human effort versus automation to identify operational gains and support strategic decision-making. I was responsible for preparing technical documentation (PDD, TDD, SDD) and fully mapping AS-IS and TO-BE processes. I worked on requirements analysis and specification, maintaining continuous alignment with clients for approvals and feasibility validations. I performed technical and financial feasibility studies for new automations and developed solutions using Automation Anywhere A360 and Control Room, including integrations with various systems and platforms. I led the standardization of bot architectures and conducted testing in both production and non-production environments, ensuring stability, performance, and quality of deliverables.

Key Skills: KPI, Leadership, Operations, Process Analysis, Process Automation, Process Management, Quality, Relationship Management, Requirement Analysis.

More Experiences

I worked for 5 years as a developer, including over 3.5 years in RPA and around 1.5 years in web development, focusing on websites and e-commerce using PHP, HTML, CSS, and JavaScript, in addition to working in commercial and administrative areas. I have 4 years of experience in process engineering, with a focus on process analysis, budgeting, implementation, planning, and team management. I have experience with automation using A360 and Blue Prism, integrations, analysis and standardization of bot architectures, documentation, and the definition of best practices. I also led technical teams, handling resource allocation, management, estimations, feedback, and people development, as well as working in pre-sales, POCs, and developer training.
